Declaration of the „conflict-minerals“

Dear Customers!

The U.S. Securities and Exchange Commission (SEC) draft regulations to implement the Conflict Mineral Law, published in the Federal Register of December 23, 2010 would have required U.S. and certain foreign companies to report and make public their use of so-called "conflict minerals", columbite-tantalite, also known as coltan (from which tantalum is derived); cassiterite (tin); gold; wolframite (tungsten), from the Democratic Republic of the Congo or adjoining countries in their products and declare about how they ensure, that human rights abused armed groups can't profit from their mineral buying.

In this declaration, we would like to inform you, as a partner of the HAFNER Pneumatika Kft. that we make our products only parts and materials from reliable and qualified suppliers with long-term supplier connection. At the same time, as an end product manufacturer, we have no leverage to the minerals source, what our supplier's materials and parts contain. For this reason we do not take responsibility in this context. We require invisibility and traceability from our suppliers, moreover many manufacturers and suppliers indicate on their website the materials source of supply and origin.

Our company is not involved in direct importation of minerals, such as the "conflict-minerals", besides we gathered the right information from our suppliers. Based on this, we declare that we do not have products manufactured or traded with parts or materials that contain "conflict-mineral" from the Democratic Republic of the Congo or adjoining countries.

We also ask for your understanding, because of the greatly increased requests and needs, we can't complete various questionnaires on this topic.

However, we hope that this statement will contain the information you need, and hereby thank you for your trust and cooperation.
